

# CASE IH ENTRY LEVEL GUIDANCE

## EZ-GUIDE® 250 DISPLAY

Case IH the proven leader in GPS guidance technology, is proud to offer the EZ-Guide® 250 lightbar. With an intuitive user interface and a colour screen, the Case IH EZ-Guide® 250 is easy to operate straight out of the box. Plus, you can upgrade to the EZ-Steer® assisted steering system, delivering a total package priced far less than the competition.

### Built-in GPS receiver

Provides submeter accuracy, or OmniSTAR VBS 20cm pass-to-pass accuracy with optional antenna.

### 15 Bright guidance LEDs

Give you quick visual feedback to keep you on track.

### 11cm colour screen

Choose between plan and 3D perspective views, to see at a glance where you are and what you've been doing.

### OnPath® filter technology

For improved pass-to-pass accuracy.

### GPS data output

To supply GPS position data to your combine or forage harvester display for yield monitoring.

### Radar speed output

### Night or Day use

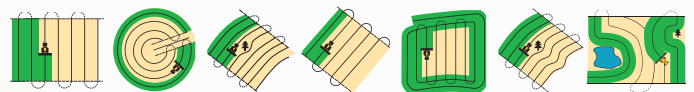

Switch to Night Mode for better visibility when working in low light conditions. Mark and locate in-field hazards with feature mapping. Find the next path easily with SwathFinder assistance.

### USB stick

Simply transfer your day's coverage maps to your computer using a USB stick. Easily print out coverage reports and import/export field and coverage maps via the same USB.

### Field Finder technology

Automatically locate stored fields as you drive near them.

### Seven guidance patterns

Offers guidance flexibility, allowing you to work in different patterns and shapes that best fit your fields' layout and contours.

# FOLLOWING THE LEADER JUST GOT EASIER ... AND MORE AFFORDABLE

## ADDITIONAL ADVANTAGES

- Add EZ-Steer® for hands-free assisted steering.
- Multiple guidance patterns including FreeForm™.
- Optional cabling available for radar speed and NMEA output.
- Mounts using a simple-to-install RAM mount.
- Rugged cast aluminium housing for reliable operation and durability.
- Adjustable screen brightness for day or night operation.

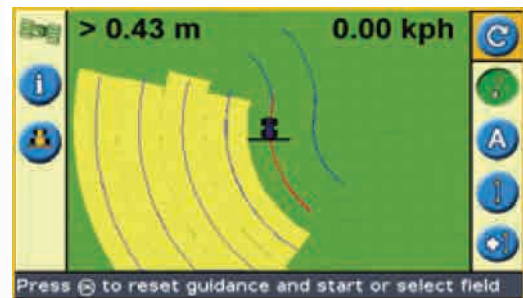

## SIMPLE OPERATION

- On-screen wizards get you up and running quickly.
- The StartUp Wizard removes any guesswork by allowing you to input all the information required to start guidance with a quick and easy, step-by-step process.
- Other wizards help set up EZ-Steer® calibration, implement dimensions and new field pattern selections, including: straight, curve, headland, pivot and FreeForm patterns.

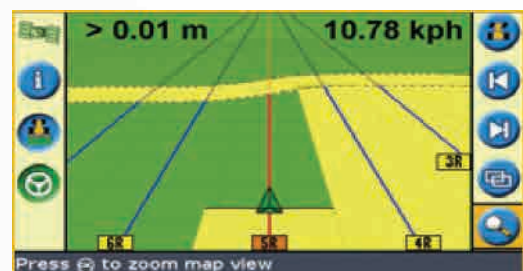

## MAPPING

- The Overhead view shows where you are and where you've been (right).
- For a different point-of-view, see the Perspective view (shown bottom right).
- With the Zoom button you can zoom in to see the detail of skips or overlaps, or zoom out for a complete view of the field you are working in.
- Insert a USB stick and easily transfer your coverage maps to your PC for printing.

## FUNCTION BUTTONS

- One-touch function buttons give you quick help and extra how-to information any time.
- The first press of the Info button shows hectares covered, field area and implement width – press again for quick satellite and position updates.
- The Help button shows the on-screen help for the view you are working in.
